Head lice continue to cause concern and frustration for some parents, teachers and children. This school policy is intended to outline roles, responsibilities and expectations of the school community to assist with treating and controlling head lice in a consistent and coordinated manner.

Whilst parents have the main responsibility for the detection and treatment of head lice our school community will work in a cooperative and collaborative manner to assist all families to manage head lice effectively.

This school policy draws on information from the Scratching for Answers? information pamphlet and management guidelines.

It is the expectation of parents/carers and families attending this school that you will:

- Check your children's hair for head lice weekly, at home, using the recommended conditioner/combing detection method.
- Not allow your child to attend school with untreated head lice (in accordance with Public Health and Wellbeing Regulations 2009).
- Regularly inspect all household members and then treat them if necessary.
- Tie your child's hair back if it is long.
- Treat head lice safely and as recommended.
- Notify the parents or carers of your child's friends so they can check their children and treat if necessary.
- Maintain a sympathetic attitude and avoid stigmatising or blaming families who are finding it hard to control head lice.
- Act responsibly and respectfully when dealing with members of the school and broader community around issues of head lice.

To support parents/carers and the broader school community to achieve a consistent, collaborative approach to head lice management the school will:

- Distribute up to date and accurate information on the finding, treating and controlling head lice to parents and staff at the beginning of the year or more frequently if required.
- Include information about head lice management in orientation and transition programs for new families/staff attending the school.
- Include annual head lice updates for staff in-service programs.
- Provide practical advice and maintain a sympathetic attitude and avoid stigmatising or blaming families who are finding it hard to control head lice.
- Access community educational resources and support, such as primary school nurses, community health centres and local government.
- Only exclude children from school with live insects.
- Accept the advice of parents that appropriate treatment has commenced.
- Encourage children to learn about head lice to help reduce stigma or bullying.
- Be aware of real difficulties some parents may have and seek extra support if required.
- Review the head lice policy annually and seek endorsement from the School Council/community.
- Act responsibly and respectfully when dealing with members of the school and broader community around issues of head lice.
- Seek opportunities to increase our collective understanding of and response to managing head lice.
